Hillside New Units

Completed Rehab Unit

New Unit Section

Observatory Hill, Pittsburgh, PA • 2004

The steep site allowed the opportunity to design affordable homes with great views of the green valley below. Taking advantage of the site, the 3 new construction and 3 rehab units have amenities such as a living room with 10' high ceiling, three large bedrooms, a street-side integral garage, and, on the lower level, a second full bath and future family room.
